

Correct answer is highlighted in yellow:

1- What is the diagnosis? (image reference: personal collection)

- A- Normal sinus rhythm
- B- Ventricular tachycardia
- C- Atrial fibrillation
- D- Atrial tachycardia

2- What is the diagnosis? (image reference: <https://thesgem.com/2015/10/sgem133-just-beat-it-atrial-fibrillation-with-diltiazem-or-metoprolol/>)

- A- Normal sinus rhythm
- B- Ventricular tachycardia
- C- Atrial fibrillation
- D- Atrial flutter

3- What is the diagnosis? (image reference: <https://jetem.org/hyperkalemia/>)

- A- ST elevation myocardial infarction
- B- Hyperkalemia
- C- Ventricular tachycardia
- D- Left bundle branch block

4- What is the diagnosis? (image reference: personal collection)

- A- Wolf-Parkinson-White syndrome
- B- Ventricular tachycardia
- C- Atrial fibrillation
- D- Atrial flutter

5- What is the diagnosis? (image reference: personal collection)

- A- Ventricular fibrillation
- B- Ventricular tachycardia
- C- Normal sinus rhythm
- D- Atrial tachycardia

6- What is the diagnosis? (image reference: personal collection)

- A- Brugada syndrome
- B- Wolf-Parkinson-White syndrome
- C- Long QT syndrome
- D- Normal ECG

7- What is the diagnosis? (image reference: personal collection)

- A- Ventricular paced rhythm
- B- Right bundle branch block

- C- Atrial paced rhythm
- D- Hypercalcemia

8- What is the diagnosis? (image reference: personal collection)

- A- Ventricular paced rhythm
- B- Right bundle branch block
- C- Ventricular tachycardia
- D- Left bundle branch block

9- What is the diagnosis? (image reference: personal collection)

- A- Ventricular paced rhythm
- B- Non-ST elevation myocardial infarction
- C- ST elevation myocardial infarction
- D- Acute pericarditis

10- What is the diagnosis?

- A- Sinus bradycardia
- B- 1st degree AV block
- C- Complete heart block
- D- Ventricular tachycardia
